160 / 220 Identity & access

Azure Region / Azure Subscription

Users

Production Virtual Network — Resource Group

DMZ / WEB / APP / DATA

VM / Web Server / NGINX / Proxy: Nginx, Apache, Tomcat. etc. / VM / APP: JAVA, PHP, etc. / PostgreSQL Instance / DATAL MySQL, MSSQL, Postgres

VPC Tunneling

Management Virtual Network — Resource Group

DevOps/SysAdmin

DMZ / WEB / APP / DATA

VM / Web Server / Proxy: Nginx, Apache, etc. / Trend Micro / VM / Unified Dashboard / Qualys / APP: JAVA, PHP, etc. / PostgreSQL Instance / Postgre SQL Instance / DATAL MySQL, MSSQL, Postgres

Security baked in/provisioned as part of the Azure infrastructure

Azure Storage / Key Vault / Network Security Groups / Azure Load Balancer / Data Encryption

XentIT understands the challenges and priorities to create, monitor and maintain a secure cloud environment that meets HIPAA requirements.

With this solution, we automate the majority of this complex puzzle so our clients can leverage an actionable, timely, and a cost effective offering built on the secure cloud foundation of Azure.
